

# WHY KNAUF

All Products Are Made Under One Roof.

KNAUF is manufactured in a state-of-the-art, fully automated factory, according to ISO 9001 standards. The entire process from start to finish is managed from under one roof. We have the capacity to apply not only standard colors and finishes, but also pantone or customized color finishes, using continuous roller coating processing line. Not only does this ensure the quality of the finish, but also the versatility to manufacture virtually any color you may require. The painted aluminium then moves on to the lamination line, where the panels are formed and rolled. This machinery is at the cutting edge of our industry, ensuring that we deliver to you a first class product.

## KNAUF/FR

With a good fire performance according to many international standards, KNAUF/FR is a fire safe material, fully conforming to the fire test standards set by construction law.

## Fire Test Results

ASTM E84-10b ASTM E119	DIN4102 Part1	BS476 Part 5, Part 6 BS476 Part 7	UL-94	NFPA 285	EN 13501-1	ISO-TR 9122-3
